EDUCATION

George Mason University

Fairfax, VA

Bachelor of Science in Computer Science, Dean's List, GPA: 3.97/4.00

Fairfax, VA

- **Leadership:** ColorStack Academic Chair, Google Developer Groups Technical Lead
- **Selective Programs:** Pinterest Pin It To Win It, Capital One Tech Summit

EXPERIENCE

Co-Founder & Backend Engineer

Apr. 2026 – Present

Parkeye LLC (App Store)

Fairfax, VA

- Launched a campus parking forecasting app on the App Store, reaching **500+** downloads in its first week and **400+** weekly active users across George Mason University's commuter student body
- Built the backend as a **FastAPI** service over **PostgreSQL**, serving forecast endpoints to a **React Native** client on 30-second polling, recomputing predictions on a scheduled batch worker, and instrumenting **Sentry** error tracking to surface production failures before users reported them
- Designed an **ETL** pipeline loading **25,700+** lot-occupancy records across 5 years and 14 lots into PostgreSQL, feeding an **XGBoost** quantile model that forecasts occupancy ranges up to 4 hours out

Software Engineer Intern (Return Offer)

Jun. 2026 – Aug. 2026

State Farm

Bloomington, IL

- Engineered **Spring Boot** and IBM z/OS Connect **REST** endpoints cutting per-request time **from 2 minutes to 15 seconds** for scheduling product model deployments serving **130 million** customers
- Built a full-stack internal tool with a **Java Spring Boot** REST API and **React** frontend, simplifying issuance timestamp setup for **20+** engineers across **100+** weekly requests
- Shipped the service to development and QA on Red Hat OpenShift on **AWS** through a **GitLab CI/CD** pipeline, gated by a **JUnit** regression suite on every release

Junior Programmer Intern

Jan. 2026 – May 2026

Transurban

Alexandria, VA

- Developed a **Python** pipeline processing **4,000+** daily ETC transactions, automating statistical analysis of toll violations and logging detection confidence metrics to a **MySQL** database
- Automated monitoring of ETC transaction build latency with a **Pandas** alerting script, replacing weekly manual health checks and cutting failure detection latency by **~99%**

Undergraduate Teaching Assistant

Jan. 2026 – May 2026

George Mason University

Fairfax, VA

- Tutored **40+** students across office hours, lab sessions, and **200+** Piazza responses, debugging **Java** programs and diagnosing errors in recursion, object-oriented design, and data structure implementations

PROJECTS

UFCStyles - Style Similarity API | AWS Lambda, API Gateway, DynamoDB, Terraform, PyTorch

[GitHub](#)

- Served style-similarity queries at **70ms p95** from a torch-free **NumPy** inference path on **AWS Lambda** behind **API Gateway**, with **DynamoDB** and ECR provisioned end to end via **Terraform**
- Trained **PyTorch** autoencoder and contrastive (NT-Xent) encoders on leak-free, point-in-time snapshots of **8,800+** UFC bouts, recovering held-out martial-arts backgrounds **45 points** above a random baseline

Consil AI - Assistant for Elementary Teachers | Next.js, TypeScript, Supabase, Azure

[GitHub](#)

- Won **1st Place at PatriotHacks 2025 (AI Track)** against **33** teams, shipping a teacher dashboard on a Supabase-backed data layer handling auth, storage, and access control for student profiles and seating charts
- Integrated an **Azure OpenAI** planning agent with a BeautifulSoup scraper behind **Next.js** API routes, returning source-backed improvement plans for each student profile

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, FastAPI, React, React Native, Next.js, JUnit, Pandas, NumPy, PyTorch

Cloud & Databases: AWS, Azure, PostgreSQL, MySQL, DynamoDB

Tools: Git, Docker, Terraform, GitHub Actions, GitLab CI/CD, Jira, Expo, Unix/Linux, Claude Code

Concepts: Data Structures & Algorithms, RESTful APIs, Relational Databases, Containerization, CI/CD
